

# Workshop 2: Building Real World Chatbot Systems Using Azure OpenAI API

Date

# Workshop Objective

**Build a chatbot application that addresses a concrete real-life or organizational challenge**

## What you'll learn:

**Generating and using  
mock data**

**Function calling  
capabilities**

**Request batching for  
efficiency**

**Handle prompts  
effectively**

# Application Options

**Choose One or Define Your Own:**

## **Customer Support**

**Automation for common queries and issue resolution**

## **Employee Onboarding**

**Assistant for new hire processes and policies**

## **✂ IT Helpdesk Bot**

**Technical support and troubleshooting**

## **Sales Lead Qualification**

**Chatbot for qualifying potential customers**

# AI Tools Usage Guidelines

|  Tool |  Usage |
|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|
| Azure OpenAI Python SDK (openai lib)                                                   | Connect to ChatGPT models, send prompts, and process completions                          |
| Azure OpenAI API                                                                       | Craft prompts for generating, summarizing, or transforming text                           |

## Team Composition & Roles

This workshop is designed for group of learners, each building their own AI-powered assistant. Collaboration happens informally through sharing progress and feedback.

### Function Calling

Dynamic data retrieval

### Batching

Efficient request handling

### Context Management

Multi-turn conversations

# Deliverables by End of Workshop

**Clearly defined real-world problem** and mock data schema

**Well-crafted prompt templates** using few-shot and chain-of-thought techniques with mock data

**Complete OpenAI SDK-based chatbot code** implementing chat completion, function calling, batching, and message management

**Tested conversation logs** demonstrating multi-turn dialogue with context

**Team presentation** with demo, insights, and lessons learned

# Timelines

**9:00 – 9:10**

**Stabilize seats for Trainees, take attendance**

**9:10 – 10:00**

**Share artifact files with Trainees . Describes the problem statement, deployment format, desired output**

**10:00 – 17:00**

**Trainees: Discuss and implement Submit all to SharePoint**

# THANK YOU!

 **Ready to Build Amazing AI Tools?**  
**Let's turn your repetitive tasks into automated solutions!**
